#### Wednesday November 28<sup>th</sup>

PICTURE DAY!!!

---

### Interesting fact about Maria Montessori

In 1873, she and her family moved to Florence and in 1875 to Rome due to her father's work. In 1883, at age 13 she entered an all-boys technical institute to study for a career in engineering. In 1890, she graduated at the age of 20, with a certificate in physics-mathematics, but she had decided to study medicine instead.
